

Falla 2

Found by Martin Jacobson who opened some lines on this secret little wall. The game started and Lorentz Ulmer and Stefan Rasmussen climbed most of the lines remaining during 2021. Shadenfreunde is a long dyno and are the hardest on the wall at least if you ask the author;) Wall problems tend to being linked together and there is even more possibility to do some variations. This guide focus on 15 nice problems :) and bear with me the names might be wrong... Location on map. Follow a small dirt road for some 300 meters.
