

Henriksnäs + hemma

South of Västervik on a small half island the following boulder problems can be found. The boulders and walls are on water polished gneiss of the highest quality of rock. A small but big area due to its potential. Problem established by Stefan Rasmussen and this is my guide to you. Sorry for the bad quality but i am human.

Location 57.617815,16.578881
